

Western DataCom Co., Inc.

3200 Series Connector Board

March 2003

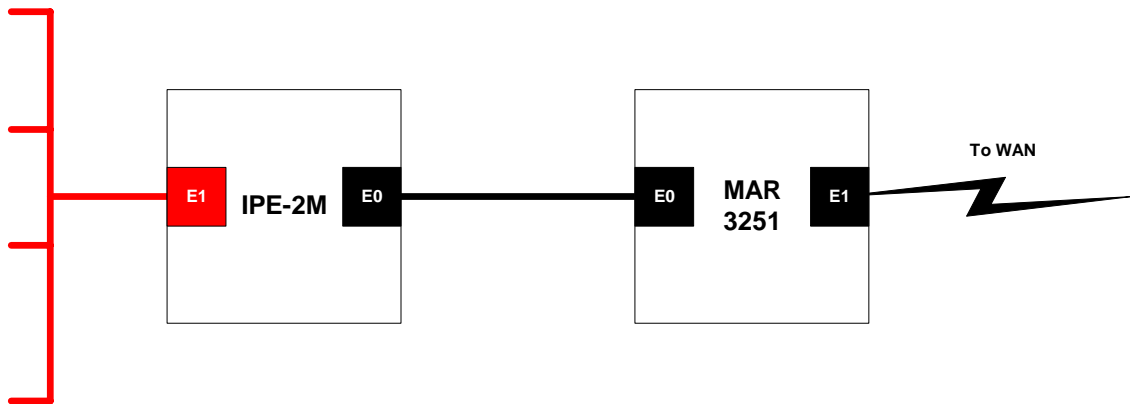

Enclosed you will find the 3200 Series Connector Board for use with the Western DataCom IPE-10M and Cisco 3200 Series products. The 3200 allows you to terminate connections from the 3251MAR, 3201FESMIC and IPE-10M to industry standard RJ45 connectors using the supplied ribbon cables.

The 3200 Series connector board allows for connections to an IPE-10M in both Strategic and Tactical applications. The dual purpose Ethernet interface provides the versatility necessary for both applications.

Strategic Connections:

- Connect MAR3251 FA0/0 cable from the MAR to ALTE0 connector
- Connect IPE BLACK Ethernet to IPE connector next to ALTE0
- Connect IPE RED Ethernet to IPE connector near Zeroize switch
- Make remaining connections to MAR and FESMIC cards

Tactical Connections:

- Connect MAR3251 FA0/0 cable from the MAR to ALTE0 connector
- Connect IPE RED Ethernet to IPE connector next to ALTE0
- Connect IPE BLACK Ethernet to IPE connector near Zeroize switch
- Make remaining connections to MAR and FESMIC cards
